I am developing an app with ionic framework. I want to test it on my android and IOS devices. What should I do? I can install the app with cordova on my mac and run it on my device, but I can't install the app on my android devices because it is in the Ionic Framework. How can I install the app with cordova on my android phone? A: You can create a mobile hybrid app with cross platform capabilities with a cross platform library : New Year's Resolution Fitness: Completely Left Your Laptop in the Car What is your New Year's resolution? This year, take on a fitness challenge. Or better yet, do both. It seems that not only do health clubs and health reses are always stressing about your health, but there are plenty of online challenges out there and a wide variety of new apps for tracking fitness. According to a new report by the American College of Sports Medicine, 60 percent of Americans have New Year's resolutions related to their physical fitness. Of these, 11 percent of respondents from a national sample plan to lose weight, while 22 percent plan to tone up, and 26 percent plan to increase overall fitness. It's not just the pros, though, who are challenging themselves this time of year. In fact, New Year's resolutions by the kids are relatively well-rounded, too, says Lisa DiCesare, PhD, assistant professor of human development at Ohio State University, and director of the Exercise and Child Development Laboratory. She says it doesn't matter what your kids' resolution is,

whether it's to be more active or lose some weight, just as long as it helps them, makes them feel good, and is sustainable. To make sure your New Year's resolution workout is actually helping your child, check in with their old habits and see how they're changing. Kids typically like to lose the pounds and tones down the extra
