Added ability to specify an alternate path for plugin dll files during installation. Added ability to Install WinBolt without user interaction. Added ability to exclude files from installation for when requested. Added ability to include multiple files for the install command. Minor bug fixes. @ BDOLloFounder, is that a bug in BDOLLo's description or am I not reading it correctly? If you are talking about the slider bar at the top. The default for single operation is 'Start sequence'. The bars can be of two different sizes. The top one is for the time span of the operation and the right one is for the number of items in the operation. I am wondering now why the two bars of the time span and the number of items are only shown if the start sequence option is selected. In other words: the small slider bar at the top is of no use without the larger one to the right.Q: GZIP compression of files and whole directories? This is the same question as What's the difference between "gzip -r" and "gzip \*.gz"?. In short: if I'm compressing a directory, will it compress each file in the directory, or just the directory? A: It will compress everything below the directory, but nothing above. If you want
